Preface xii

## 1

### **The Voice and Voice Therapy 1**

The Biological Function of the Larynx 2

The Emotional Function of the Larynx 3

The Linguistic Function of the Voice 4

Voice Disorders in the Normal Population 5

Kinds of Voice Disorders 6

Organic Voice Disorders 8

Neurogenic Voice Disorders 8

Psychogenic Voice Disorders 9

Muscle Tension Dysphonia 9

Management and Therapy for Voice Disorders 10

Summary 13

Thought Questions 13

## 2

### **The Normal Voice 14**

Normal Aspects of Voice 15

Normal Processes of Voice Production 15

Respiration 16

Anatomy of Phonation 25

Principles of Phonation 41

Resonance 48

Structures of Resonance 48

Mechanism of Resonance 49

Summary 53

Thought Questions 53

## **3 Organic Voice Disorders 54**

- Cancer 56
- Congenital Abnormalities 56
  - Laryngomalacia 56
  - Subglottal Stenosis 57
  - Tracheoesophageal Fistulas and Esophageal Atresia 57
- Contact Ulcers (Granulomas) 58
- Cysts 61
- Endocrine Changes 61
- Hemangioma 63
- Hyperkeratosis 63
- Infectious Laryngitis 64
- Laryngectomy 64
- Leukoplakia 65
- Papilloma 66
- Pubertal Changes 68
- Reflux 69
- Sulcus Vocalis 71
- Webbing 73
- Summary 74
- Thought Questions 74

## **4 Neurogenic Voice Disorders 76**

- A Working View of the Nervous System 77
  - The Central Nervous System (CNS), the Cortex, and Its Projections 77
  - Pyramidal and Extrapyramidal Tracts 78
  - The Peripheral Nervous System (PNS) 82
- Flaccid Dysarthria 87
  - Vocal Fold Paralysis 87
  - Myasthenia Gravis 92
  - Guillain-Barré 93
- Unilateral Upper Motor Neuron Dysarthria (UUMND) 93

<b>Spastic Dysarthria</b>	94
<b>Hypokinetic Dysarthria</b>	95
Parkinson's Disease	95
<b>Hyperkinetic Dysarthria</b>	97
Spasmodic Dysphonia	98
Essential Tremor	104
Differences among Spasmodic Dysphonia, Essential Tremor, and Vocal Hyperfunction	105
Huntington's Disease	106
<b>Ataxic Dysarthria</b>	107
<b>Mixed Dysarthria</b>	108
Amyotrophic Lateral Sclerosis (ALS)	108
Multiple Sclerosis (MS)	109
Traumatic Brain Injury	110
<b>Summary</b>	111
<b>Thought Questions</b>	112

## 5

## **Functional Voice Disorders 113**

<b>Psychogenic Voice Disorders</b>	114
Falsetto	114
Functional Aphonia	116
Functional Dysphonia	118
Somatization Dysphonia (Briquet's Dysphonia)	120
<b>Excessive Muscle Tension Disorders</b>	120
Muscle Tension Dysphonia	120
Reinke's Edema	122
Vocal Fold Nodules	123
Vocal Fold Polyps	125
Traumatic Laryngitis	126
Ventricular Dysphonia	127
Diplophonia	130
Phonation Breaks	130
Pitch Breaks	131
<b>Summary</b>	132
<b>Thought Questions</b>	132

## **6 Voice Evaluation 133**

Screening for Voice Disorders 134

Medical Evaluation for Voice Disorders 135

Assessment, Evaluation, and Diagnosis of Voice Disorders  
by the Clinician 138

Review of Auditory and Visual Status 142

Case History 142

Noninstrumental Assessment 146

Instrumental Assessment 150

The Clinical Voice Laboratory 161

Clinical Instrumentation for Acoustic Analysis 162

Clinical Instrumentation for Aerodynamic Analysis 168

Three Case Studies Comparing Noninstrumental and Instrumental  
Assessment Approaches 171

Summary 178

Thought Questions 179

## **7 Voice Therapy 180**

Voice Management and Therapy for Children 181

Voice Therapy for Adolescents and Adults 184

Voice Therapy Facilitating Techniques 185

1. Auditory Feedback 186

2. Change of Loudness 189

3. Chant-Talk 192

4. Chewing 194

5. Confidential Voice 196

6. Counseling (Explanation of Problem) 198

7. Digital Manipulation 200

8. Elimination of Abuses 203

9. Establishing a New Pitch 205

10. Focus 207

11. Glottal Fry 211

12. Head Positioning 213

13. Hierarchy Analysis	215
14. Inhalation Phonation	218
15. Laryngeal Massage	220
16. Masking	222
17. Nasal/Glide Stimulation	224
18. Open-Mouth Approach	226
19. Pitch Inflections	228
20. Redirected Phonation	230
21. Relaxation	233
22. Respiration Training	236
23. Tongue Protrusion /i/	239
24. Visual Feedback	241
25. Yawn-Sigh	243
Summary	246
Thought Questions	246

## 8

### **Management and Therapy for Special Problems 247**

#### **Management-Voice Therapy for Particular Populations 248**

The Aging Voice	248
Deaf and Hard of Hearing	252
Pediatric Voice Problems	255
Professional Voice Users	256
Transgender (Transsexual)	259

#### **Management-Voice Therapy for Respiratory-Based Voice Problems 261**

Airway Obstructions	261
Asthma	262
Emphysema	263
Faulty Breath Control	264
Paradoxical Vocal Fold Movement	265
Tracheostomy	266

#### **Management-Voice Therapy Following Laryngeal Cancer 266**

Facilitating Techniques	270
-------------------------	-----

**Laryngectomy 270**  
    Counseling and Communication Options 270  
    The Electrolarynx 272  
    Traditional Esophageal Speech 272  
    Tracheoesophageal Puncture Shunt (TEP) 273  
**Summary 275**  
**Thought Questions 275**

## **Therapy for Resonance Disorders 276**

**Nasal Resonance Problems 277**  
    Hypernasality 277  
    Hyponasality 278  
    Assimilative Nasality 278  
    Evaluation of Nasal Resonance Disorders 279  
    The Oral Examination 283  
    Laboratory Instrumentation 284  
    Treatment of Nasal Resonance Disorders 290  
**Therapy for Oral–Pharyngeal Resonance Problems 301**  
**Summary 306**  
**Thought Questions 306**

### **References 307**

### **Index 335**
