1 Introduction to Speech-Language Neurology, 1

- Why Neurology?, 2
- Recent Contributors to the Study of Neurologic Communication Disorders, 3
- Historic Roots: Development of Speech-Language Pathology as a Brain Science, 5
 - Early Language Models, 5
 - World War I, 6
 - Modern Times, 6
 - Neurodiagnostic Studies in Speech and Language, 7
- Directions and Planes, 13
- Anatomic Orientation, 13
- How to Study, 14

2 Organization of the Nervous System I, 19

- Human Communication Nervous System, 20
 - Foundations of the Nervous System, 20
 - Organization, 24
- Central Nervous System, 25
 - Cortical Divisions, 25
 - Cerebral Connections, 29
 - Specific Cortical Areas, 31
 - The Limbic System, 33
 - Basal Ganglia Circuits, 40
 - Cerebellum and Brainstem, 40
 - Spinal Cord, 43

3 Organization of the Nervous System II, 47

- Peripheral Nervous System, 48
 - Spinal Nerves, 48
 - Cranial Nerves, 50
- Autonomic Nervous System, 50
- Protection and Nourishment of the Brain, 54
 - Meninges, 54
 - Ventricular System, 56
 - Cerebrospinal Fluid, 57
 - Blood Supply of the Brain, 59
- Development of the Nervous System, 66
 - Early Development, 68
 - Spinal Cord, 70
 - Brain, 74
- Embryology of the Peripheral Nervous System, 75
 - Development of the Meninges, 76
 - Development of the Ventricles, 76
 - Critical Periods, 76
- General Principles of Neurologic Organization, 76
 - Contralateral Motor Control, 76
 - Ipsilateral Motor Control, 77
 - Bilateral Speech Motor Control, 77
 - Unilateral Language Mechanisms, 78

- Scheme of Cortical Organization, 79
- Appendix 3-1, 86

4 Neuronal Function in the Nervous System, 88

- Neuronal Physiology, 89
 - Neuron, 89
 - Chemical and Electrical Properties of Cells, 89
 - Ionic Concentration Gradients, 92
 - Electrical Forces, 92
- Cellular Potential, 92
 - Neural Messaging, 93
 - Action Potential, 94
 - Graded Potentials, 95
 - Hyperpolarization, 95
- Myelin, 96
 - Development of Myelin, 96
 - Myelin Disorders, 96
- The Synapse, 96
 - Neurotransmitters, 97
 - Chemical Transmission in the Motor System, 100
- Principles of Neuronal Operation, 101
 - Degeneration and Regeneration, 102

5 Neurosensory Organization of Speech and Hearing, 105

- Classification, 106
 - Sherrington's Scheme, 106
 - Sensory Association Cortices, 106
- Anatomy of Sensation, 107
 - Somatic Sensation, 107
- Sensory Examination, 109
 - Light Touch, 109
 - Two-Point Discrimination, 110
 - Pain and Temperature, 110
 - Recognition of Limb Position, 111
 - Stereognosis, 111
 - Vibratory Sensibility Test, 111
 - Body Sway Test, 111
- Neuroanatomy of Oral Sensation, 111
 - Sensory Pathway of Cranial Nerve V, 112
 - Sensory Pathway of Cranial Nerve IX, 112
- Oral Sensory Receptors, 112
 - Oral Proprioceptors, 113
 - Studying Oral Sensation, 113
 - Sensory Control Modalities, 113
 - Speech Proprioception, 114
- Visual System, 114
 - Retina, 114
 - Path of the Optic Nerve, 114
 - Primary Visual Cortex, 115

- Visual Association Cortex, 116
- Visual Integration, 116
- Visual Agnosia, 117
- Central Auditory Nervous System, 118
 - Receptor Level, 118
 - Cranial Nerve Level, 120
 - Brainstem Level, 120
 - Auditory Radiations and Cortex, 120
 - Auditory Physiology, 120
 - Lesions of the Auditory System, 121
- 6 Neuromotor Control of Speech, 124**
 - Motor Control for Speech Production, 125
 - Motor Planning, 125
