

Foreword v
 Preface vii
 Acknowledgments ix

CHAPTER 1

Essential Concepts and Principles of Neuroscience1

Relationship between Neuroscience and Speech-Language-Hearing Pathology1
 Scope of Neuroscience3
 Principles Governing Functional Organization of the Human Brain6
 Orientation to Basic Terminology8
 Gross Structures of the Central Nervous System14
 Functional Classification of the Nervous System15
 Cellular Organization (Cytoarchitecture) and Brodmann Areas16
 Techniques for Solving Problems When Learning Neuroscience18
 Clinical Considerations24
 Summary24
 Quiz Questions25
 Technical Terms26

CHAPTER 2

Gross Anatomy of the Central Nervous System27

Structures of the Central and Peripheral Nervous Systems27
 Primary Divisions of the Brain29
 Gross Structures of the Brain30
 Ventricles60
 Medullary Centers in the Brain61
 Meninges of the Brain65
 Meninges of the Spinal Cord70
 Cranial Nerves71
 Autonomic Nervous System75
 Lesion Localization77
 Clinical Considerations78
 Summary80
 Quiz Questions81
 Technical Terms81

CHAPTER 3

Internal Anatomy of the Central Nervous System82

Anatomic Orientation Landmarks82
 Spinal Cord in Cross-Sections84
 Brainstem in Transverse Sections86
 Forebrain in Coronal Sections101
 Forebrain in Horizontal Sections108
 Summary113
 Quiz Questions113
 Technical Terms113

CHAPTER 4

Development of the Central Nervous System114

Human Chromosomes, Genes, and Cell Division114
 Early Human Development116
 The Central Nervous System119
 Clinical Concerns125
 Summary129
 Quiz Questions129
 Technical Terms130

CHAPTER 5

Basic Physiology of Nerve Cells131

Neuron131
 Central and Peripheral Nervous Systems134
 Neuronal Pruning and Synapse Establishment in the Brain135
 Nerve Impulse137
 Neuronal Responses to Brain Injuries139
 Neurotransmitters143
 Clinical Concerns147
 Clinical Considerations149
 Summary150
 Quiz Questions150
 Technical Terms151

CHAPTER 6

Diencephalon: Thalamus and Associated Structures152

Gross Anatomy of the Diencephalon152
 Thalamus152
 Functional Classification of the Thalamic Nuclei160

Epithalamus160
 Subthalamus160
 Hypothalamus161
 Cognitive Functions of the Thalamus161
 Thalamic Syndrome161
 Clinical Considerations162
 Summary163
 Quiz Questions163
 Technical Terms163

CHAPTER 7

Somatosensory System164

Somatosensation164
 Innervation Pattern166
 Anatomic Division of the Somatosensory System166
 Trigeminal Nerve176
 Unconscious Proprioception180
 Lesion Localization—Rule 3: Spinal Central Gray Lesion182
 Clinical Considerations182
 Summary184
 Quiz Questions184
 Technical Terms184

CHAPTER 8

Visual System185

Anatomy of the Eye185
 Vascular Supply of the Retina190
 Photochemistry of Retina191
 Optical Mechanism192
 Central Visual Pathways195
 Visual Cortex Development197
 Visual Reflexes197
 Clinical Concerns200
 Lesion Localization—Rule 4: Visual Pathway Lesion205
 Clinical Considerations205
 Summary206
 Quiz Questions206
 Technical Terms207

CHAPTER 9

Auditory System208

Sound, Properties, and Measurements208
 Anatomy and Physiology209
 Central Auditory Pathways214
 Auditory Reflexes219
 Vascular Supply to the Auditory Mechanism219
 Distinctive Properties of Auditory System219
 Clinical Concerns221
 Clinical Considerations224
 Summary226

Quiz Questions226
 Technical Terms226

CHAPTER 10

Vestibular System227

Anatomy of the Vestibular System227
 Neural Mechanism for Controlling Eye Movements232
 Physiology of Equilibrium233
 Clinical Concerns234
 Clinical Diagnostic Tests235
 Clinical Considerations236
 Summary237
 Quiz Questions237
 Technical Terms237

CHAPTER 11

Motor System 1: Spinal Cord238

Spinal Preparation238
 Innervation Pattern238
 Gross Anatomy of the Spinal Cord239
 Tracts of the Spinal Cord240
 Motor Nuclei of the Spinal Cord245
 Motor Functions of the Spinal Cord245
 Spinal Reflexes248
 Neurotransmitters252
 Clinical Concerns252
 Lesion Localization256
 Clinical Considerations257
 Summary259
 Quiz Questions259
 Technical Terms259

CHAPTER 12

Motor System 2: Cerebellum260

Innervation Pattern261
 Cerebellar Anatomy261
 Cerebellar Cortex266
 Motor Learning268
 Clinical Concerns268
 Clinical Considerations270
 Summary271
 Quiz Questions271
 Technical Terms271

CHAPTER 13

Motor System 3: Brainstem and Basal Ganglia272

Brainstem Motor Mechanism272

Basal Ganglia	274
Clinical Concerns	280
Clinical Considerations	286
Summary	288
Quiz Questions	288
Technical Terms	288

CHAPTER 14

Motor System 4: Motor Cortex	289
Anatomy of Motor Cortex	289
Innervation Pattern	290
Clinical Terms	291
Descending Pathways	291
Clinical Concerns	293
Lesion Localization	296
Clinical Considerations	297
Summary	299
Quiz Questions	299
Technical Terms	299

CHAPTER 15

Synopsis of Cranial Nerves	300
Functional Classification of Cranial Nerves	301
Branchial Origin of Speech-Related Muscles	302
Cranial Nerves and the Autonomic Nervous System	306
Cranial Nerve Nuclei	306
Pathways	308
Innervation Pattern	309
Cranial Nerves and Their Sensorimotor Functions	310
Function-Based Cranial Nerve Combinations	342
Clinical Concerns	343
Common Cranial Nerve Syndromes	344
Clinical Considerations	347
Summary	351
Quiz Questions	351
Technical Terms	352

CHAPTER 16

Axial-Limbic Brain: Autonomic Nervous System, Limbic System, Hypothalamus, and Reticular Formation	353
Autonomic Nervous System	353
Limbic System	360
Hypothalamus	364
Reticular Formation	369
Clinical Considerations	375
Summary	376
Quiz Questions	377
Technical Terms	377

CHAPTER 17

Survey of the Cerebrovascular System	378
Vascular Network	378
Selective Vulnerability to Anoxia	389
Risk Factors	390
Venous Sinus System	391
Regulation of Cerebral Blood Flow	391
Treatment of Vascular Diseases	393
Blood–Brain Barrier	395
Lesion Localization—Rule 10: Vascular System Disorder	395
Clinical Considerations	396
Summary	397
Quiz Questions	398
Technical Terms	398

CHAPTER 18

Survey of the Ventricles and Cerebrospinal Fluid	399
Choroid Plexus	399
Cerebrospinal Fluid Circulation	399
Absorption of the Cerebrospinal Fluid	400
Clinical Concerns	401
Clinical Considerations	403
Summary	404
Quiz Questions	404
Technical Terms	404

CHAPTER 19

Cerebral Cortex: Higher Mental Functions	405
Methods of Study	405
Functional Localization in the Brain	405
Disorders of Cortical Functions	408
Clinical Considerations	417
Summary	420
Quiz Questions	420
Technical Terms	420

CHAPTER 20

Diagnostic Techniques and Neurologic Concepts	421
Brain Imaging	421
Advances in MRI	427
Additional Imaging Techniques	430
Sodium Amytal Infusion for Assessing Cerebral Dominance	431
Electroencephalography	434
Electromyography	436
Evoked Potentials	437

Dichotic Listening	439	Quiz Questions	449
Lumbar Puncture	440	Technical Terms	450
Neurosurgical Procedures	440	<i>Glossary</i> 451	
Genetic Inheritance	442	<i>Suggested Readings</i> 479	
Specific Neurologic Disorders	444	<i>Figure and Table Credits</i> 483	
Summary	449	<i>Index</i> 487
