Preface	vii
Acknowledgments	viii
About the Illustrator	ix
SECTION I: FOUNDATIONS OF SPEECH AND VOICE SCIENCE	
1 Introduction	1
The Clinically Useful Science of Speech and Voice	2
Defining Speech Science	4
2 Describing and Explaining Motion	7
Systems of Measurement	9
Describing Motion: Speed, Velocity, Acceleration, and Deceleration	10
Newton's Laws Explain Motion	11
Momentum	12
Energy	13
Properties of Matter	15
3 Sound Waves	25
Vibration	27
Perception of Sound Waves	43
Pure and Complex Tones	46
Behavior of Sound Waves	52
Resonance	55
SECTION II: BREATHING AND PHONATION	
4 Breathing	69
Introduction	71
Respiration	73
Balloons or Boyle's Law?	73
Anatomy of the Lower Airway	75
The Biomechanics of Breathing	82
The Biomechanics of Speech Breathing	89
Neural Control of Breathing	99
The Work of Breathing	100
Instrumentation for Measuring Breathing Kinematics	104
5 Phonation	113
Overview	117
Anatomy of the Larynx	117
Neural Control of Phonation	136
Theories of Voice Production	140
Biomechanical Stress-Strain Properties of Vocal Fold Tissues	153
Physiology of Phonatory Control	156
Voice Quality	168

6	Phonation II	177
	Measurement of F0 and Intensity	181
	Measurement of Phonatory Aerodynamics	187
	Instrumentation for Exploring Vocal Fold Dynamics	192
	Vocal Registers	203
SECTION III: RESONANCE AND ARTICULATION		
7	The Production and Perception of Vowels	215
	Introduction	217
	Three Sources of Speech Sounds	218
	Acoustic Theory of Speech Production	218
	Vowels	228
	The Vocal Tract as a Regulator of Intensity	246
	Acoustic Filters	250
	Instrumentation for Measuring Vocal Tract Acoustics	252
	Vocal Tract Imaging	262
8	The Production and Perception of Consonants	283
	Introduction	285
	Phonetic Description of Consonants	288
	Acoustic Representation of Consonants	289
	Suprasegmentals	325
	Instrumentation and Measurement of Vocal Tract Aerodynamics	334
	Instrumentation for Measuring Articulation	337
SECTION IV: RESEARCH TOPICS IN SPEECH PRODUCTION AND PERCEPTION		
9	Theories of Speech Production	353
	Introduction	355
	Theories and Models	357
	Theoretical Issues for Consideration	358
	Investigational Considerations	374
	Influences from Connectionist Models	378
	Language and Speech	380
10	Theories of Speech Perception	393
	Introduction	395
	Topics in Speech Perception	395
	Theories of Speech Perception	400
	What Babies Can Tell Us About Perception	404
	Glossary	413
	Appendix A: Measurement Conversions	427
	Appendix B: Test Passages for Voice and Speech	428
	Appendix C: Frequencies of the Musical Scale	431
	Appendix D: The International Phonetic Alphabet	432
	Appendix E: Answer Key	433
	Index	437
