

Contents

CHAPTER 1

Introduction to Plant Disease Diagnosis 1

Reasons for Diagnosing Plant Diseases • The Diagnostician • Diversity of Clinic Specimens • Plant Disease Characteristics • Concepts in Diagnosing Plant Diseases • Levels of Reliability (Confidence) in Making Diagnoses • Steps in Diagnosing Plant Diseases • References

CHAPTER 2

The Plant Disease Clinic 7

Receiving Area • Office and Records • Examination Room • Equipment and Supplies • Field Clinics

Appendix to Chapter 2 Sample Forms

CHAPTER 3

Gathering Information 37

Examining Field Problems • Recording Field Information • Collecting, Preparing, and Shipping Specimens

CHAPTER 4

Diagnosing in the Field 47

Field Disease Signatures • Postharvest Disease Problems • Mycotoxins and Mycotoxicoses • Using the Field Diagnosis for Laboratory Confirmation • References

Appendix 4.1 University-related plant disease and soil testing laboratories in the United States and Canada

Appendix 4.2 Some problem plant species associations or planting sequences

Appendix 4.3 Susceptibility of some plant species to juglone from roots of black walnut and related species

CHAPTER 5

Diagnosing in the Clinic 97

Handling Plants and Clinic Routine • Plant Examination and Techniques • Enhancing the Presence of Fungi • Care and Use of Microscopes • Injury Caused by Soil pH and Soluble Salts

Appendix 5.1 Plant species that may tolerate soils that are very strongly acidic (pH < 4.5) or strongly alkaline (pH > 8.3) without serious injury

Appendix 5.2 Plant species and their sensitivity to soil soluble salts and, where indicated, to airborne salt spray

Measurements and Conversions 123

Weights • Area Measures • Cubic Measures • Volumes • Linear (or Distance) Measures • Dilutions • Miscellaneous Weights and Measures • Weights per Unit Area • Metric-English Conversion Factors • Temperature Conversions

Glossary 127

APPENDIX A

Sterilizing Agents 165

- I. Heat Sterilization
- II. Surface Sterilization
- III. Liquid Sterilization by Filtration

APPENDIX B

Culture Media, Formulas, and Procedures 167

- I. NCSU Media
 - II. Other Common Media for Fungi and Bacteria
 - III. Common Selective Media for Plant-Pathogenic Bacteria
- References

APPENDIX C

Fixatives 205

APPENDIX D

**Mounting and Staining Fungi
for Microscopic Examination 207**

- I. Mounting and Staining Media
- II. Stains for Freehand Sections
- III. Stains for Paraffin Sections

APPENDIX E

**Staining Bacteria
for Microscopic Examination 215**

- I. Gram's Stain
- II. Staining Flagella
- III. Staining Cell Walls
- IV. Staining Spores
- V. Staining Bacteria in Host Tissues

APPENDIX F

Cements for Sealing Mounts 219

APPENDIX G

Cleaning Solutions 221

- I. Glassware
- II. ELISA Plates

APPENDIX H

Temperature and Humidity Control 223

- I. Cabinets and Growth Chambers
- II. Small, Airtight Containers

APPENDIX I

pH Indicators 225

APPENDIX J

Buffers 227

APPENDIX K

**Collection, Preparation, and
Mailing of Cultures and Specimens 229**

APPENDIX L

Preserving Specimens 231

- I. Wet Specimens
- II. Dry Specimens

Selected References for Appendixes 233
